

ZOLL®

SIMPLIFY. STANDARDISE. IMPROVE.

YOUR DEDICATED SERVICE PARTNER

ZOLL® offers a wide range of products that focus on improving patient care and outcomes in many environments. From defibrillation and ventilation to data and device management for resuscitation and acute critical care, ZOLL is the partner you need to move care forward for your EMS and hospital teams alike. A complete solution from one provider simplifies training, facilitates device maintenance and management, and improves your team's performance with standardised processes.

Our comprehensive system maximises value, boosts efficiency, and fosters a culture of improved outcomes.

Working together to save lives

ZOLL's diverse portfolio offers products and services that are closely integrated to help EMS and hospital teams improve outcomes for multiple disease states.

CLINICAL SUPPORT

Customised clinical programmes for pre-hospital and in-hospital teams

- Courses conducted by ZOLL's Clinical Support Team, all of whom are experienced clinicians
- Workshops, master classes and a variety of programmes to cultivate and enhance practices of high-quality CPR and high-quality manual ventilation

DATA MANAGEMENT

Software solutions to improve your workflow and outcomes

- Defibrillator Dashboard™: Efficient asset management for improved device readiness
- RescueNet® CaseReview: Case debriefing, performance trends and reporting
- RescueNet® Live: Data transmission to meet your telemedicine needs
- RescueNet® CodeWriter: Simplifies in-hospital code data documentation using mobile phones or tablets

TRAINING

Comprehensive offerings for all care providers

- Customised deployment and training for all ZOLL equipment by factory-trained, clinically experienced experts
- E-learning options

SERVICE AND SUPPORT

Award-winning technical support around the globe

- Dedication Beyond Delivery with ExpertCare™ — attractive service options to cover maintenance, updates and repair needs
- Technical follow-up on device replacement

REGULATORY COMPLIANCE

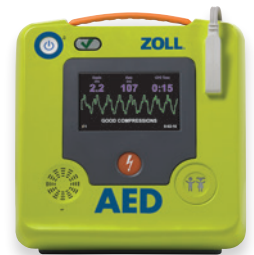

Expert solutions that meet compliance regulations

- Vast regulatory knowledge of international compliance requirements for all devices
- Dedicated experts working towards compliance with local regulations, such as the new Medical Device Regulation (MDR) in the European Union, are available to answer questions

ZOLL AED 3® BLS

Used as a first response in sudden cardiac arrest emergencies, the ZOLL AED 3 BLS helps rescuers deliver high-quality CPR. It includes WiFi connectivity, RescueNet® CaseReview for event summaries and analysis, enhanced Real CPR Help® and one of the fastest AED shock times in the industry.

R SERIES®

The R Series monitor/defibrillator is the worldwide choice of hospitals for in-hospital resuscitation. It features a full suite of tools to support high-quality CPR, including a complete CPR Dashboard™ for both adults and children, See-Thru® CPR filtering, and OneStep™ adult and paediatric electrodes that automatically initiate CPR feedback after placement.

X SERIES®

Lightweight and compact, the X Series is the optimal monitor/defibrillator to cover your Critical Care Transport needs. It offers pacing and defibrillation as well as advanced monitoring features such as capnography, pulse oximetry, temperature channels, 12-lead capabilities, and non-invasive and invasive blood pressure measurements.

DATA SOLUTIONS

From reliable data transmission and tools for reviewing clinical performance to efficient asset management, ZOLL's software solutions support your clinical and operational needs so your organisation can focus on saving lives.

- Asset management and device readiness monitoring and reporting
- Case debriefing and performance trends reporting
- Remote view capabilities
- 12-Lead ECG management and transmission
- Easy code documentation

Z VENT®

The Z Vent portable ventilator is easy to use and lightweight, allowing rescuers to seamlessly ventilate adult, paediatric and infant patients in pre-hospital, during transport and in the hospital, even into MRI. The unprecedented 10-hour battery runtime and multi-source power system allow rescuers to rapidly charge and operate the ventilator using any power source in the operating environment.

AUTOPULSE®

Designed for Resuscitation on the Move™, the AutoPulse automated CPR device delivers customised, high-quality CPR wherever — and whenever — it's needed. Rescuers can continue delivering CPR while moving patients, in the ambulance, or in the cath lab. When used with X Series Advanced, its Shock Sync™ technology helps to improve the likelihood of a successful defibrillation.

X SERIES® ADVANCED

Advance the level of your care with ZOLL's new ALS monitor/defibrillator. X Series Advanced provides real-time clinical feedback on manual ventilation with Real BVM Help®, and the TBI Dashboard™ enables smart monitoring of your most critical patients. It also features advanced communications technology to ensure that clinicians can access the data they need from anywhere.

ONE PARTNER, ONE SOLUTION

Founded on ground-breaking science, ZOLL is a global company that is committed to the development of cutting-edge technologies and product innovation. We invest in research and clinical feedback technologies to best serve our EMS and hospital partners and empower rescuers globally.

All our technologies are designed to help pre-hospital and hospital teams optimise their care and to help facilitate the management of patients every day. Together, we can establish a system focused on improving patient outcomes.
